Digital Literacy

Name

Short-answer text

Registration number:

B *I* U

Short-answer text

What is digital literacy?

B *I* U

- ☐ Ability to cook food
- ☐ Ability to use digital devices and services
- ☐ Ability to drive a car
- ☐ Other: _____

What is the internet used for?

- ☐ A) Connecting people and sharing information
- ☐ B) Cleaning
- ☐ C) Sleeping

Which of the following is a digital device?

- ☐ A) Book
- ☐ B) Pen
- ☐ C) Smartphone
- ☐ D) Notebook

Which of the following is a strong password?

- ☐ A) 123456
- ☐ B) password
- ☐ C) abc123
- ☐ D) A@7kL9#p

What should you do to stay safe online?

- ☐ A) Share your password
- ☐ B) Talk to strangers
- ☐ C) Keep personal information private
- ☐ D) Click every link

Project Report

For this task, I worked with two platforms: a coding practice site and Google Workspace. In Part A, I created an account on HackerRank and completed a beginner-level challenge. This helped me strengthen my problem-solving skills and gave me exposure to competitive programming environments. I also took a screenshot of my completed challenge and badge to document my progress.

In Part B, I used Google Forms to design a Digital Literacy Awareness Quiz with five questions, including multiple-choice and short-answer formats. I then linked the form to a

Google Sheet to automatically collect responses. This exercise gave me hands-on experience with collaborative tools, as the form can be shared with batchmates for real participation.

These platforms are academically valuable because coding practice builds logical thinking and technical confidence, while Google Workspace enhances collaboration, data collection, and communication. Together, they support both individual skill development and teamwork. The Google Form is not just an exercise—it can serve as a real deliverable for digital literacy awareness among peers, aligning with the role of a Digital Ambassador.
